<ul style="list-style-type: none">SSC (Class X), percentage: 52.80%	

Skills

C | Java | Python | JavaScript | MySQL | Git | PHP | HTML | CSS | | Codeigniter Framework |

Work Experience

AB Software Solution Satara PHP Developer Inten	Feb'30
<ul style="list-style-type: none">Developer of PHP at Absoftware.Creating a database in PHP with MySQL and connecting it to the web building a new module in response to a customer request.	

Projects

Expenses Web Application	Feb'1
<i>Expenses-based web application created in Codeigniter with the PHP Framework.</i>	
<ul style="list-style-type: none">An application is produced to handle the office employees' monthly expenses.The application creates an Employee database with their id and adds the Person, Date, Money, and Expenses Category.You may view the expenses that employees have incurred or you can update and delete the expense list.This programme saves information on users or employees who have requested expenses from their employer.	
Followup web Application	Jan'1
<i>A website that uses Core PHP and is based on the daily tasks that employees perform.</i>	
<ul style="list-style-type: none">The application has a user and a central admin who may assign daily tasks for the user to perform.The programme is applicable to any organisation that manages daily tasks or to-do lists.Only the administrator can assign tasks from the admin panel, and the user can view the tasks on their user panel.The user may leave feedback on a task after it has been completed and closed.The application functions similarly to an employee management system or a TO-List.
